

Accessories

MUSB2, Connector for battery charging

MSW2, Connector for remote switch control

TC3, Multi-usage tail cap, use for turning on / off and battery charging and remote switch control.

1S White Laser Tactical Flashlight

Specifications

ANSI / PLATO FL1	High	Medium	Low	Strobe			
	Output (lumens)	700	280	120	700		
Runtime (hours)	1.5	2.5	8	4			
Beam Distance (m)	1,000	400	100	1,000			
Peak Beam Intensity (cd)	250,000	40,000	2,500				
Impact Resistance (m)				1.5			
Water proof				IPX6			

Battery: 18650 lithium-ion
 Size: 5.63" x 1.37" x 0.93" (143 x 35 x 23.5 mm)
 145 grams (excluding batteries)
 Color: Black or Desert Tan

Description

The 1S is a white laser output tactical flashlight, the perfect tactical light for military and police and aiming users.

While click the tail cap switch to turn on, the light would be output on the second step according to the program that was turn off. Return to off, then press or click again for next output, then run in cycle.

The white laser for long distance search, while it is zooming in, the white beam delivers to 1,000 meters.

The difference between white laser and LED, the advantages of white laser is smaller power consumption, lower lumen, but the light reaches greater distance.

The 1S runs on a single recharge-able battery of 18650 lithium-ion which needs to be taken out for charging. Alternatively, to use the accessory TC3, the flashlight can charge directly, and no need to take batteries out for charging, then just use the accessory, MUSB2, plug into a USB Port.

Assembled as a weapon-light, use the accessory, MSW2, for a remote control

Made of durable aerospace-grade aluminum, with Mil-Spec type III hard-anodized for extreme durability

Installed on picatinny rail with a scope mount ring.
